AQ200 Aquatic Herbicide is used as a foliage application for the control of free floating and emergent aquatic weeds with the addition of an Aquatic Surfactant.

AQ200 Aquatic Herbicide is a contact aquatic herbicide with the mode of action being the destruction of cell membranes.

Apply at a rate of 400mL AQ200 Aquatic Herbicide plus 150mL wetting agent, together into 100L of town/tank water in a spray unit and spray to wet aquatic weeds thoroughly. Results will be notable up to 14 days after application.

The Aquatic Weed Control Experts

AQ200 Aquatic Herbicide & wetting agent

Application Rates:

| Product | Where to Use | How Much To Use | How to Apply | When To Apply |
|---|--|--|--|-----------------------|
| AQ200 Aquatic Herbicide | Submerged Aquatic Weeds | Dilute 1 part product to 10 parts water (town or tank). Apply at a rate of 5L or 10L AQ200 per 1ML of water to be treated. | Spray (stream spray only) diluted AQ200 evenly across the water's surface OR Inject into the water directly over the aquatic weeds. | Once or as required. |
| AQ200 Aquatic Herbicide & wetting agent | Free Floating Aquatic Weeds and Emergent Aquatic Weeds | Combine 400mL AQ200 Aquatic Herbicide plus 150mL wetting agent and dilute in 100L water. | Spray (stream spray only) diluted AQ200 and wetting agent mix and spray directly onto aquatic weeds. | Once, or as required. |
| Hydrogel + AQ200 Aquatic Herbicide | Target Specific Submerged Aquatic Weeds | Refer to detailed instructions. | | |

For Best Results: Submerged Aquatic Weeds AQ200 works best in clearer water. For water with high turbidity, it is advised to use an approved flocculent (such as Aquatic Clear Dam) prior to application. Use higher rates for dense infestations. Ensure that there is no overspray, as this will affect non-targeted plants. Use with Hydrogel for more target specific results.

For Best Results: Free Floating Aquatic Weeds and Emergent Aquatic Weeds

AQ200 works best in clearer water. For water with high turbidity, it is advised to use an approved flocculent (such as Aquatic Clear Dam) prior to application. Use higher rates for dense infestations. Ensure that there is no overspray, as this will affect non-targeted plants. AQ200 must be used in conjunction with a wetting agent when targeting Free Floating and Emergent Aquatic Weeds.

NOTE: Use PPE including: Gloves, goggles, masks and overalls/protective clothing. **DO NOT** use treated water for human consumption, livestock watering or irrigation purposes for 10 days after application. **DO NOT** use a mist spray when applying.

APVMA Approval No. 81984/104562

SUITABLE FOR

Large Pond

15,000L - 50,000L
0 - 50m²

Small Dam

50,000L - 1ML
50m² - 2,000m²

Large Dam

1ML - 10ML
2,000m² - 10,000m²

Lagoon

10ML+

Lake

10ML+
10,000m²+
