Clear a path up to  
1.57m wide and 8m long  
with each throw >

Expands up to 1.57m wide

Adjustable angle widths

## Weed Razor Pro

The hand tool that offers the widest cutting path on the market

Its adjustable blades make the *Weed Razor Pro* a unique aquatic vegetation cutter and one capable of effectively and efficiently clearing your lake or pond in minutes.

The *Weed Razor Pro* weighs only 4.8kgs but is nimble enough to throw 8m from the shore, a dock or a boat. It cuts an incredible path of 1.57m wide.

- Cut with seven different adjustable angle widths to match the density and type of vegetation you are cutting
- Clear aquatic vegetation in narrow channels or large areas in a short time
- Harvest a variety of emerged and submerged aquatic weeds, including cumbungi, bulrush, etc.
- Slice at the base of the weed with very little resistance. It slices weeds rather than dragging them
- Cut weeds can be easily collected with the *Weed Rake*
- Comes fully assembled with a 7.6m rope and hand sharpener

After you are done, simply fold the two blades and store, no disassembly is required.

**Caution:** Blades are very sharp! Always keep the blade covers on the *Weed Razor Pro* when not in use.
