Commonly Used Aquatic Herbicides for Control of Aquatic Plants & Algae in Australia

This table is adapted from product label recommendations and general literature based on the above constituent. Other plant species could be affected. Exercise care when non-target plants are present. Individual products and labels can vary. Follow individual product recommendations to determine effectiveness and application rate. Label information and recommendations are subject to change. Read and follow all product label recommendations and restrictions. This listing does not include all available aquatic herbicides and/or formulations.

E = Excellent; G = Good; F = Fair					
Aquatic Plant		**Herbicides**			
		AQ200	**Orange Oil**	Glyphosate	**Coptrol**
Free Floating Aquatic Weeds	Azolla	E*	E		
	Duckweed	E*	E		
	Green Azolla	E*	E		
	Red Azolla	E*	E		
	Salvinia	E*	E	G*	
	Waterlettuce	E*		G*	
	Water Hyacinth	E*		G*	
Submerged Aquatic Weeds	Bladderwort	E			
	Coontail	E			
	Elodea	E			
	Fanwort	G			
	Hydrilla	G			G
	Parrotfeather	E			
	Pondweed	E			
	Potamogeton	E			
	Watermilfoil	E			
Emergent Aquatic Weeds	Alligatorweed			G	
	Bulrush / Cumbungi	E			
	Cattail	E			
	Common Reed	E			
	Giant Reed	E			
	Pennywort	E			
	Sedges/Rushes	G			
	Torpedograss	G			
	Water Lily	G		G	
	Water Primrose	G		E	
Algae	Blue Green Algae	F			E
	Filamentous Algae	F			E
	Chara	F			E
	Nitella	F			E

As at November 2017. *The additives of a wetter agent or surfactant may be required.
